

Jan Deploige

Opleiding

2023 - 2026

Professional Bachelor in Applied Computer Science, Systems and Network Management

2021 - 2023

Secondary education: Physical Education and Sports

Ervaring

2022 - heden

Haskey Hasselt

Developing and maintaining the website of ice hockey club Haskey Hasselt with SvelteKit, and managing the club's Microsoft Entra environment (user management, SharePoint, Microsoft Exchange, support, ...).

2025 - 2026

Stage bij Black Talon

Automating Cloudflare services with a CI/CD pipeline and infrastructure as code. The result is a base framework for internal use that can be built upon, making it easier to roll out configurations for customers.

2023 - 2025

Arcsec Space

Developing and maintaining the Arcsec Space website with Hugo, a static site generator.

Extra

Homelab

In my own homelab I design, configure and maintain a technical environment where I actively experiment with automation and Linux. It lets me turn theory into hands-on experience, explore new technologies on my own and keep deepening my skills in a realistic setting. This site is hosted on my homelab too!

Talenkennis

Dutch - Native

English - B2 / C1

Interesses

 Ice Hockey

 Gaming

Soft skills

Hard skills

Systems

- Linux
- Bash
- Windows Server
- Active Directory

Networks

- Protocols
- Caddy
- Nginx

Monitoring

- Grafana
- Prometheus
- Datadog

Containers

- Docker / Podman

Cloud, Microsoft 365

- Cloudflare
- SharePoint, Entra ID, Exchange
- AWS, Azure, Hetzner

Automation, DevOps

- Ansible
- Python
- Terraform, OpenTofu, Terragrunt
- CI/CD: Jenkins, GitHub Actions, GitLab CI, Bitbucket CI

Web development

- Sveltekit
- Typescript
- Java, Spring boot
- GoHugo
- Wordpress
- Ghost
